Education

Sep 2011 - Jun 2015
University of California, Los Angeles
B.S. in Computer Science
GPA: 3.503

Aug 2007 - Jun 2011
Central Catholic High School
GPA: 4.0 unweighted

Skills

- C++
- HTML & CSS
- Javascript & jQuery
- C
- C#
- Ruby on Rails
- Git
- SQL and MongoDB
- Comfortable in UNIX or Windows

Work Experience

Starbucks

Technology Intern   Jul 2012 - Sep 2012

I implemented the location services and database for an update to the API for the Starbucks mobile app. During my internship, I wrote in C#, working within the ASP.NET MVC 4 framework, and used MongoDB for the new database.
I also provided IT support at the Starbucks' "Tech Café," their new corporate walk-in enterprise helpdesk. I helped Starbucks partners with issues ranging from MS Office help to removing viruses.

educandio

Frontend Developer   Aug 2012 - present

I am currently working at educandio, a local startup company. I am responsible for leading the visual direction of educandio's web app, and am the primary frontend developer (working in HTML, CSS, and jQuery). I also occasionally work in the app's backend, Ruby on Rails. We will very soon extend our app into the tablet market, at which point I will likely work in Android development.

Central Catholic H.S.

IT Support   Jul 2009 - Jun 2011

At Central Catholic, I provided IT support for teachers. Additionally, I sat on a subcommittee of the school board as a "student consultant" on matters of technology direction and funding.
